

# Fun with Envy Screenshots - Sports

With the holidays here, we thought it would be fun to take a breather from turning out Envys non-stop and enjoy some screen time for a change. Here are some great pics showing Envy in action. These pics were taken with a handheld iPhone camera off a 12-foot-wide screen with an Envy Extreme at the helm. These photos were not altered in any way, except to crop excess screen borders and to downsize them to nicely fit here.

Want your projector to look like this? Visit the [madVR Envy website](#) to learn how!
