

## Meet Us at CEDIA 2022!

Come see the Envy on display, and meet madVR Labs Co-founder and CEO **Richard Litofsky**, head of Training and Support **Ryan Charpentier**, **Global Sales Director Howard Leibowitz**, and others from the madVR Labs staff at CEDIA 2022.

### Discover Our CEDIA Plans

The Envy Extreme will be on display in several exciting demo rooms at CEDIA. For starters, an Envy Extreme will power the video processing in our official booth #26097. This awesome 11.12.6 Atmos demo room is sure to knock your socks off. In addition to the Envy Extreme, it features a Barco Njord CinemaScope projector on a Seymour 15-foot wide 2.40 screen, along with mind-blowing gear from **our official show partners Trinnov, Sonus Faber, McIntosh, Kaleidescape, and Officina Acustica**. Please see the [official press release](#).

In addition, there will be **an Envy Extreme demo station immediately outside the room**, where we will demonstrate the ins and outs of the Envy and cover the business and technical reasons why an Envy is a must-have for all high-end cinema rooms today.

There will also be several other high-performance demo rooms and places to see the Envy Extreme in action at CEDIA, including in the **Absolute Ultimate AV demo room in booth #25106** and the **Seymour-Screen Excellence demo room in Sound Room 2**.

Last but not least, the Envy Extreme will also be shown in **other amazing setups at and around CEDIA, by private invitation**. If you work in the industry, contact us for more details if interested.

## Let's Meet!

We would absolutely love to meet with you to discuss your interest in the Envy and show you how it has turned the video processing market on its head in just two short years. If you work in the industry, please email [hello@madvr.com](mailto:hello@madvr.com) ASAP to book a dedicated appointment with us. If you do not work in the industry and are attending as an enthusiast, we'd love to meet with you as well - please stop by at any time.

We are excited to see you at CEDIA!

## We're Hiring!

madVR Labs continues to expand our staff to keep up with our growth worldwide, with the Envy now distributed in over 30 countries. We're currently looking for an Operations Manager (must reside in the USA). Responsibilities include managing shipping, production schedules, inventory, and our supply chain. Experience in finance is a big plus. If you're interested or know someone who is, please email us at [hello@madvr.com](mailto:hello@madvr.com).

Thank you for receiving this email and being the best part about what we do!
