

## **Secrets of Home Theater says the Envy Extreme MK2 is "Unmatched" and provides "Superb motion processing with MotionAI"**

We're thrilled to share an exciting update with you. Our flagship product, the madVR Envy Extreme MK2, has received outstanding praise in this [brand new review](#) from the well-respected **Secrets of Home Theater & High Fidelity** publication by the esteemed Chris Eberle.

This positive feedback affirms our unwavering dedication to providing you, our valued customers, with the ultimate immersive video experience for your home theater, with non-stop innovations such as MotionAI. Each supportive review, [including last month's review](#) earning the Envy ProjectorCentral's 5-Star Editor's Choice, strengthens our resolve to continually innovate for you at the forefront of our mission.

**At \$15,995, madVR's Envy Extreme Mk2 Video Processor is a premium purchase but nothing else can boast its capabilities. It truly enhances any display.**

## LIKES

- Easy setup with well-designed menus
- Remote login assistance available from madVR support
- Superb motion processing with MotionAI
- HDR tone-mapping superior to any display or source component
- Premium build quality with 5-year warranty
- Hardware is upgradeable

## WOULD LIKE TO SEE

- I wish I could afford one

The [Secrets of Home Theater review](#) praises the Envy Extreme MK2 for its impeccable engineering, superb build quality, future-focused features, HDR tone mapping, superb MotionAI motion handling without the soap opera effect, and excellent customer support from the madVR Labs team. Here are some standout quotes from their [glowing review](#):

“The madVR Envy Extreme Mk2 Video Processor brings premium video quality to your theater or media room. It enhances HDR content, corrects color, and handles de-interlacing & scaling **far better than even the best display can**. It also includes **MotionAI processing**, currently in the Alpha test phase, that makes all content look better **without the dreaded soap opera effect**.”

“ madVR offers **excellent support** that includes remote login (with the user’s permission of course) to handle any questions that might arise.”

“ It’s extremely tweakable and you can save these settings to profiles specifically for Motion AI. This is a very powerful feature and once you get it to your liking, **you’ll wonder how you lived without it.**”

“ The image stays **super clean and free of tearing or judder.** There’s even a split-screen mode for side-by-side comparisons. I was told there are plans to add 4K 120Hz support to MotionAI which will be **great for watching sports.**”

“ When compared to HDR not processed by the Envy, the improvement ranges from subtle to dramatic, but **in all cases, the Envy’s HDR just looks better.** The detail is richer and more textured and the **picture pops in a way that no display can equal on its own.**”

“ Not only was the HDR presentation improved, but I could add a little **extra motion resolution with MotionAI and still preserve the filmic look.**”

“ If you are looking for the ultimate in adjustability and video fidelity, **the madVR Envy Extreme Mk2 is unmatched**. It’s a premium purchase to be sure but **it also has no competition. Nothing else I’m aware of can do what it does and once you’ve seen it in action, you’ll want one too.**”

---

“ The resulting video quality simply **cannot be replicated by any other product** I’m aware of. Its **MotionAI processing is superb**, and it does **the best HDR tone-mapping I’ve yet seen. Build quality is as good as it gets** and the **ability to upgrade** the core video board is a huge plus. The software is **well-engineered and well-designed for easy setup and use.**”
