

## madVR Envy Delivers the Ultimate Video Experience in This High-Performance Theater

In [this new video](#), Scott Newnam, CEO of [Audio Advice](#), reviews a recent ultra-high performance theater project of theirs. This theater features 177 [Martin Logan](#) speaker drivers, a 10,000 lumen [Sony GTZ-380](#) projector, a [Stewart Filmscreen](#) 179" diagonal 2.40 StudioTek 100 screen, a [Kaleidescape](#), the "Best in Class" awarded [madVR Envy Extreme](#) video processor, and other high-end dream gear.

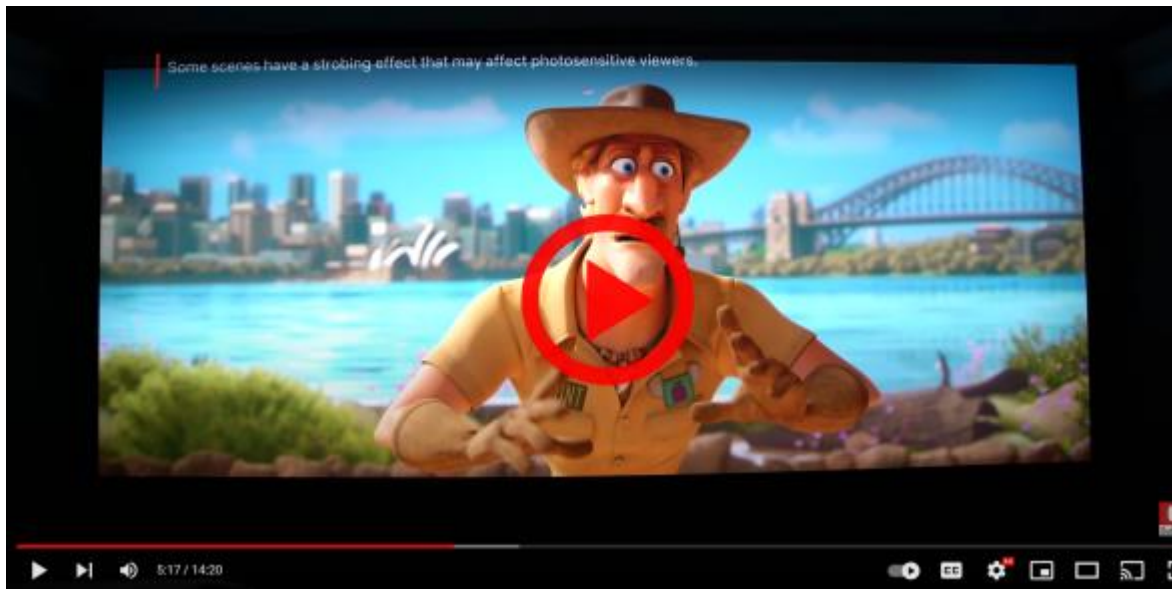

Notable quotes from the video review include:

*"The Envy Extreme is the most advanced video processor made, and does a superb job of converting the video to the best image possible."*

*"Envy delivers incredible HDR tone mapping, which ultimately creates the best picture."*

*"The Envy can automatically detect it's a widescreen movie, and it will adjust the aspect ratio that it's sending the projector automatically. You'll see as it starts to play, it immediately figures out it's a widescreen movie, and **boom**, it fills the screen."*

Video review of this high-performance theater, featuring the madVR Envy Extreme  
*"The customer wanted to upgrade their previous theater to the highest performance possible. In this video, I will show you how we attacked the design of this room, to get the very most out of the video and audio... truly one of the most immersive theaters I have ever seen."*
