

## CE Pro "Video Guys" Podcast Names madVR Envy Best Pick of 2021

We are excited and truly humbled to announce that CE Pro "Video Guys" Podcast has <u>named the madVR Envy "Best Pick" of 2021</u>. According to their website, CE Pro is the leading trade publication for professionals involved in the custom electronics business.

This award comes on the heels of the madVR Envy also winning the <u>AVS Forum Best</u> of 2021 Award, the <u>"Best in Class" award</u> from AVForums in the UK, scoring a rare 10/10, and CEDIA's <u>Best New Hardware Product</u> in 2020.

We would like to thank CE Pro's expert video panel of Value Electronics' Robert Zohn, ISF's Joel Silver and Murideo's Jason Dustal for this prestigious honor. "It's a very, very easy to use, easy to set up and very powerful processor - that's going to be my #1 pick for 2021", says Dustal.

We look forward to continuing to delight our customers and the industry with big upcoming announcements already in the works for 2022.
