

madVR Envy Wins AVS Forum Best of 2021 Award for Video Processors

We are excited and truly humbled to announce that the madVR Envy has won the **AVS Forum Best of 2021 Award in the Video Processors category**. According to the site, the AVS Forum was started by a group of enthusiasts that shared a common passion for Home Theater. Over the years, the site has grown to over 1,300,000 members.

The award winners were first nominated, then voted on, by the entire Editorial Content Department at AVS Forum. This includes the hosts from a new video podcast show debuting later this year, and five staff reviewers, among others. The awards announcement stated, "If you're looking for the Best of the Best in our industry you can't go wrong in purchasing any of our award winners."

This award comes on the heels of the madVR Envy also winning the ["Best in Class" award](#) in 2021, scoring a rare 10/10, and CEDIA's [Best New Hardware Product](#) in 2020.

We would like to thank the AVS Forum editors and community very much for this prestigious honor. It means a lot to us that our passion for providing extreme video quality is shared with so many of you, and the best is yet to come in 2022!
