

## madVR Envy Wins “Best in Class” Award in Video Processors Category

We are excited to announce that the madVR Envy was recently named "[Best in Class](#)" in the video processor category by AVForums.com in the UK, "The No. 1 Home Entertainment Tech Community & Resource" according to the site.

This [excellent review](#), which gave the Envy a rare "10 out of 10" score, does a great job covering the ins and outs of the Envy, while also explaining why it plays a critical role in powering today's highest performance home cinemas.

Here are just a few excerpts:

*"Best known for its HDR dynamic tone mapping, and with good reason because it's **superb**."*

*"The scaling is **exceptional**...An **astonishing** video processor...delivers **unrivalled performance**."*

*"The 3D LUTs offer **incredible colour accuracy**...results are **amazingly accurate**."*

*"Auto aspect ratio control is easy to setup and **works perfectly**."*

*"Despite its inherent sophistication, **set up is incredibly easy**."*
